

## Marine Spatial Planning – Technical Tools

### WHAT DO YOU HAVE AND WHAT DO YOU NEED?

TOOLS	HAVE	NEED	SHARE Y/N/M
Word processing and/or presentation software (e.g., MS office suite)			
Collaborative project management software (e.g., MS SharePoint)			
WordPress or other website content management system			
Graphic design software			
Geographic information system / mapping software (e.g., ArcGIS)			
Web mapping or web feature services (e.g., GoogleEarth)			
Database software and/or data and knowledge storage device(s)			
Sharing protocol / policy for Indigenous knowledge or spatial data			
Environmental or biological monitoring and sampling equipment (e.g., marine probes, marine water quality)			
Sensor technologies (e.g., gas, nutrient, pH)			
Environmental or biological modelling software (e.g., delf3D)			
Vessels and/or other vehicles to access remote locations			
Radar and other navigation instruments and/or software			
Camera equipment (e.g., drone, underwater digital camera)			
Mobile tracking device (e.g., <i>Coast Tracker</i> )			
Language translation and interpretation			
Other:			

### WHAT ARE THE TOP THREE TOOLS NEEDED AND WHY?
